range overlap (Harbor)
SEM bars overlap
pooled t-test, 5%
Welch t-test, 5%
(a) false alarm by k
false-alarm rate
runs per side k
(b) detection of a fixed gap by k
P(detect a 2 SD gap)
runs per side k
(c) true gap 2 points, $k = 3$
probability
overlap passes
t-test: no gap
TOST: within ±3
run-to-run SD, points (both sides)
